The Agricultural Meeting,

At Macon last Saturday, was probably one of the most interesting ever held in the county, as a large number were present and gave the Society quite a lift. The membership is now upwards of forty, and there is no indebtedness whatever for the Society to carry. This membership will probably be increased to one hundred, which will insure success to the coming fair. The election of officers, a list of which appears in the minutes, is satisfactory to all parts of the county, so far as we have heard, and it is our opinion that every one of them will work for the Society and its success, in the year to come as they have in the year past, which will insure success so far as the officers are concerned. Work is what is needed and must be had.

A very interesting Forestal Meeting was also had, the minutes of which will appear next week.

Work to be Done at the Annual Dist. School Meeting.

As it will soon be time for the people to assemble to transact the business pertaining to their school districts for the ensuing year, I deem it important to call their attention to a few points of great interest to them and of vital importance to the success of the educational interests of the State.

1st. Full, correct and detailed reports should be required from the director and treasurer.

The director's report should embrace a detailed account of all repairs on school house, of the purchase of furniture, apparatus, reference books, etc. specifying each item and its cost; of the length of time school has been taught, name of the teacher, grade of the certificate held by him or her, wages paid per month, number of pupils attending school, average attendance, number of visits made by director, general efficiency of the school, condition of school house and out house, etc. etc.

The report should also contain suggestions and recommendations for the work of the ensuing year. It should mention the books and apparatus necessary to render the school more efficient, the repairs and fixtures necessary, length of time school should be sustained, (and it is hoped that no district will think of having less than six months), the importance of proper out houses, (there are in the State 693 school houses without a showing of an out house! Shame! Shame!! on such districts,) the amount of money needed to carry on the school, and the sources from which it must be derived.

If the director will take pains with his report, he can do very much to awaken a proper interest in the cause of education in his district, or he can do much to injure the cause, and hinder all laudable ef-

Secretary Belknap.

The house committee appointed to investigate the expenses of the war department, disclosed some startling facts concerning the bartering by Secretary Belknap, of certain Indian trading posts. Marsh, of New York, who was a partner in the post at Ft. Sill, Indiana Territory, states that in 1870, he received the appointment, for which he was to pay Mrs Belknap twelve thousand annually, which was subsequently reduced to six thousand, and paid to the Secretary in person. It is probable that this is not the only post he sold, but it is sufficient to convict him of high crime in office.

Immediately upon the rumors reaching the ears of the Secretary, who was watching events, he handed his resignation, which was accepted by the president, before the work of the investigating committee was known in the White house. This, however, will not affect the impeachment and disqualification from office, by congress, which will be the result, if the charges are sustained.

Nothing could have startled the country more than the assertions, and we might say facts, in this connection. His record in the army, and as a revenue officer, in Iowa, appears to have been

Senator Paddock made the following remarks in the Senate, in reference to the bill conferring exclusive jurisdiction over Indian reservation to the United States courts, and the punishment of crimes committed by and against Indians:

"I will state that I understand from the Secretary of the Interior that the Chief cause of irritation is that there was a misunderstanding with reference to the period of time during which the supplies should be furnished to these Indians; the Indians supposing that it was to continue indefinitely; the government, that it was only to continue for a period of four years which term has expired. The government refused to make any additional appropriation for supplies; the Indians are without sustenance; there is no money with which to defray the expenses of providing sustenance for them; and it is that cause of irritation which the government apprehends that has led it to taken the course it has taken in reference to anticipating difficulties."

Minutes of the Franklin Co. Agricultural Society Meeting.

MACON, NEB., March 4th.
Meeting called to order at 3 o'clock, p. m., by the president, H. M. Warriner. All of the officers present, and a number of the directors, and a full attendance of members.

The president stated that the first business would be the election of officers, whereupon the nomination of a president was in order. On motion of A. M. deClercq, Mr. J. F. Pugsley was put in nomination and there being no opposition, he was declared the unanimous choice of the meeting.

Dr. A. J. Weston was chosen vice-president, without opposition.

Geo. W. Sheppard, C. H. Walker, A. M. deClercq, F. M. Vancil and Ralph K. Hill, were put in nomination for Sec'y, and G. W. Sheppard having a majority of all the ballots cast, he was declared duly elected.

For Treasurer, John Hutchinson, the present incumbent, was unanimously the choice.

The following is a list of the directors for the ensuing year: Grant precinct, Aaron Wells; Franklin precinct, J. Worth; Bloomington, C. H. Walker; Turkey Creek, W. Hildreth; Oak Grove, J. W. Stinson; Ash Grove, A. M. deClercq; Macon, H. W. Robb; Buffalo, Porter B. Byer; North Franklin, Madison Kinney.

The report of John Hutchinson was then received and accepted. The Treasurer was ordered to purchase two books suitable for the use of the treasurer and secretary of the society.

Society then adjourned sine die.

to carry on the school, and the sources from which it must be derived.

If the director will take pains with his report, he can do very much to awaken a proper interest in the cause of education in his district, or he can do much to injure the cause, and hinder all laudable efforts to sustain a good school.

The great thought should be how many months can we possibly sustain school; not how few months and meet the requirements of the law. It is the education of their children that should induce the people to sustain a school; all else is of slight importance. The treasurer should give a full, concise, and detailed report of all receipts and disbursements. His report should clearly show all the sources of receipts, the time when he received any money, and the fund from which it was derived; also, an itemized report of all expenditures in detail, specify the time when paid out the fund from which it was paid, the person to whom paid, and the object for which paid.

The total receipts should always equal the total expenditures, including the moneys on hand. It sometimes happens that reports reach my office showing the expenditures to be greater than the receipts.

It is exceedingly important that the treasurer should be required to report, as it would doubtless save thousand of dollars annually to the schools of this State, and afford much satisfaction to the people of the districts, and from a correct basis for proper reports to this office.

2d. Districts should take the utmost care in selecting proper school officers.

The peace and prosperity of the district depends almost wholly upon these.

Perhaps more than one-half of all district broils and difficulties originate with district officers in some way.

When a school officer is elected he must be retained for three years. There is no way only through the courts of getting rid of him, unless he chooses to resign.

3d. The utmost care must be taken in levying district taxes.

Judge John A. Dillon, of the U. S. Circuit Court, has decided that the fund known as the contingent or incidental fund is illegal and cannot be collected; the same matter is now before the Supreme Court of this State for adjudication.

It will therefore be necessary that the objects for which the tax is levied be explicitly stated.

It will be better to itemize the levy somewhat after this form:

For repairs on school houses and school furniture.

For fuel, books of reference, and apparatus.

For teacher's wages and payment of school officers.

In order to sustain each school properly, each district will now need to levy a tax for teacher's wages, as the State levy for schools is only one-mill now. This with other causes will reduce the amount formerly received per scholar from one dollar to one and a half dollars, hence no district need expect hereafter to be able to support a school with what is received from the State apportionment.

The new constitution cuts off all State aid from district not sustaining school at least three months within the school

Saturday last was a splendid day, and the agricultural society meeting afforded a good opportunity for some of those in town who have been cooped up all winter to air themselves. A good thing for the society, as its treasury was replenished to the tune of something over forty dollars.

The Bee has discovered a "nigger in the wood pile," which it says will pop out at the State Convention to elect delegates to the National Convention, in the shape of the nomination at that time, of a full state ticket. This is the move inaugurated by the secret conclave recently held in that city, about which the Bee has had so much to say.

Dr. Razez, of Riverton, paid Bloomington a short visit Thursday, and like all good citizens from that place, dropped into the GUARD office for a social "sit down." We were glad to see him around again and to know that he is fast recovering from the wound he received in the recent unpleasantness between him and Dr. Woods.

Zeb Crummet says the fact that we receive honors in proportion to the exertion we put forth, is forcibly illustrated by a schoolmate of his, who for years studied fourteen hours each day. He is now a brakeman on a coal train.

We noticed some fine specimens of brooms at Mr. Austin's store in Macon, Saturday, of their own manufacture. We were told that they were finding quite a sale for brooms outside of the county, and would probably increase their facilities for manufacturing early in the spring. We are glad to see these prospects and hope other factories may find sustenance in the county.

We understand that Fred Lohff, Win C. Thompson, Geo. W. Thompson, Steve Taylor, and a Mr. Bentley from Riverton, and Louis Everly, John Burnes, David Oleson and Jas Granie, of Buffalo precinct, all of this county, will start for the gold fields of the Black Hills, on Monday next. This is the largest party that we know of starting from the valley and the boys have our best wishes for success in their ramblings. We hope to hear of them realizing their anticipations of a rich harvest in the hills this summer to the fullest extent. Most of the party will only make a prospecting trip of this.

We shared the hospitalities of Mr. W. H. Austin, for dinner Saturday, and they were freely bestowed and we might say freely received, for if there's any one thing we appreciate more than another, it's a good dinner, and here we got it. W. H., and his lady are just now in unusual good spirits, for it has only been a few days since a bright little centennial babe put up with them, and of course it's the pride of the household now. Our stay was short but pleasant, and we hope to have an opportunity to repeat it at no distant time.
